

ELLO SYSTEM

INSTALLATION INSTRUCTIONS | APRIL 2022

connector point dimensions

CEILING SURFACE - DIMENSIONS

MOUNTING INSTRUCTION

- 1 Open the connector point by turning the two halves a quarter and mount the top part to the ceiling with screws (screws are not included).

POWER CONNECTION

PARALLEL CONNECTION

Connect the earthing cable to the top part of the connector point.

- 3 Place the flaps of the Ello between the two parts of the connector point and connect to power. Fix the bottom part of the connector point back to the top part and close it by turning a quarter.

Note:

- per connector point there can only be 4 Ello phase-cut dimmable fixtures and 2 Ello DALI fixtures, for this extra wire connectors are added
- leave the connectors on the unused wires to keep electrical isolation
- per Ello power connection you can connect maximum 10 fixtures
